

NAVMAN WIRELESS
GPS FLEET MANAGEMENT
AND TRACKING SOLUTION

MANAGE YOUR FLEET THE WAY YOU WANT TO

KEEPING YOUR FLEET ON TRACK

Whether you have one vehicle or a thousand, the Navman Wireless GPS Fleet Management and Tracking solution is suitable for fleets of all sizes. The Navman Wireless solution uses the Telstra Next G® network and the optional Iridium satellite network to provide you with cost effective, near real-time vehicle location, mapping and reporting.

We know that your organisation is unique so you can customise the Navman Wireless GPS Fleet Management and Tracking solution for your organisation. Whether you're looking to track a single vehicle or an entire fleet, take the guess work out of knowing the location of your vehicles, job dispatching and job scheduling by having real-time intelligence about your fleet at your fingertips

Run your fleet more efficiently

- Locate vehicles in seconds and provide more accurate ETAs.
- Instantly check a job address and find/dispatch the nearest vehicle.
- Help improve response times and the number of jobs completed each day.
- Use the built-in Maintenance Module to keep track of your entire fleet's maintenance.
- If your business operates in areas where GPS coverage is limited you have the option to add our Q-Pro device which uses the world-leading Iridium satellite network.

Help deliver more competitive customer service

- Help you get a vehicle to each customer's site sooner.
- Have proof of your service delivery.
- Help improve your billing accuracy.
- Settle customer disputes quickly with easy access to information.

Be in control of your time

- Reduce reliance on manual timesheets.
- Easily confirm actual time spent at each customer site.
- Isolate travel costs and identify excessive or unauthorised vehicle use.
- Resolve any job and timesheet discrepancies easily.

MEETING YOUR BUSINESS NEEDS

Communicate more clearly

A Navman Wireless messaging system helps keep your dispatchers and drivers in touch with clear, accurate messaging:

- get complete job details to your drivers, quickly and accurately with customisable job templates
- help eliminate costly confusion and errors
- receive and archive confirmations of each message being sent and received.

Communicate and navigate to better results

Combining Navman Wireless communication and navigation means you can help keep your drivers on course, with clear dispatch messages and precise directions:

- get your drivers to your customers' sites sooner
- help eliminate unnecessary mileage and fuel costs
- your drivers no longer need to write directions or read maps while driving.

Manage your drivers more accurately

With an electronic driver ID system, you can easily and automatically manage your drivers, even when they're switching between vehicles:

- remove the time and errors of paper-based time and mileage logs
- monitor vehicle usage
- generate reports for daily, weekly or monthly driving hours
- monitor and manage driver behaviour.

FLEXIBLE MANAGEMENT OF YOUR FLEET

Whatever the cost management model you prefer, we've got you covered.

MANAGE YOUR NAVMAN WIRELESS FLEET HOW YOU LIKE

Managing your fleet is simple. Costs can be added to your monthly Telstra bill, meaning you've got just a single invoice to process.

Just like your other fleet management costs, our 36-month plan means you can turn your Navman Wireless purchase into a monthly operating expense.

Of course, if you're after flexibility, you can buy your hardware up-front and operate on a casual access plan.

Things you need to know

If you take up the Q-Pro upfront or on a monthly repayment option as part of your Navman Wireless solution, hardware (including installation and configuration) won't be included. You'll need to arrange and pay for this separately.

In order to use the Q-Pro you'll need to also separately purchase an Iridium satellite service from another provider. And if you take up the Q-Pro as part of your Navman Wireless solution, you'll be billed separately by Navman for all your usage charges associated with the Q-Pro. For further information visit www.navmanwireless.com.au

If you take up the Navman MDT and Q-Pro devices, mobile communications is not available while in satellite navigation mode.

All prices include GST and are correct at time of printing. If you are connected to a 36-month plan and you cancel your plan early, you must pay us an early termination charge as outlined in your agreement with us.

CASUAL OPTION (PER VEHICLE)
